Response to Arguments

Page 2

1. Applicant's arguments filed 7/9/03 have been fully considered but they are not persuasive to overcome the prior art.

2. Applicant argues the prior art did not teach (c) receving a response from access control web server.

Examiner notes the prior art taught the origin server (or access control Web server) obtain a copy of the request object and forwarded to the client by proxy cache [Cohen col 7 lines 11-35]

3. Applicant argues the prior art did not teach (d) control access.

Examiner notes the prior art taught a large ISP control its proxy caches a client request is directed [Cohen col 1 lines 24-43]; connection control block [Cohen col 8 line 59-col 9line 17]; program control and dedicated logic [Cohen col 17 lines 42-63].

4. Claims 17 and 33 contain the similar limitations set forth of claim 1. Therefore, claims 17, 33 are rejected for the similar rationale set forth in claim 1.

Thus, the rejection is sustained.
